## Preface

This book is a reworking of a manuscript originally prepared by Basima Abed. Together with a brief introduction and indices, it included transliterations, autographed copies and photographs of a group of texts that were confiscated from illicit excavators by the Iraqi Antiquity Authorities as part of a larger group of texts now housed in the Iraq Museum. The common element that ties these texts together is their identical archival and commercial context; they can be identified as certain components of the archive belonging to Šamaš-zēru-ibni, son of Ayyana-naʿad, an agricultural entrepreneur who was active in and around the Southern Babylonian city Šāter during the second half of the fifth century BCE. In addition to the 60 texts of the original manuscript, the book presents seven more texts that can plausibly be connected to the same archive. These texts were studied by Muḥannad K. J. Al-Shammari within the framework of his dissertation at the University of Baghdad (2018). Johannes Hackl revised the original manuscript and, in particular, reworked the introduction. Furthermore, he added translations and compiled a catalog and prosopography.

In the course of writing this book we have received help and support from many individuals and institutions, and it is a pleasure to thank them here. We are grateful to Laith M. Hussein, head of the State Board of Antiquities and Heritage, for granting permission to publish the texts in the care of the Iraq Museum; to its staff members for their patient assistance during many research visits; to Hanan Abd al-Hamzah, head of the Cuneiform Department, for making available the texts for study; to Rients de Boer and Kristin Kleber for bringing us in contact, thus laying the foundation of our fruitful collaboration; to Anmar A. Fadhl for his constant support and unwavering help with collecting and taking photographs; to Taichuan Tang for reference checking and undertaking the unenviable task of preparing the copies and photographs for publication; to Marie Barkowsky and Marie Young, also for reference checking and providing helpful observations and corrections; to Ludovica Cecilia, Michael Jursa, Manfred Krebern timer and Reinhard Pirngruber for factual information, discussion and suggestions; to Emily Zeran for proofreading the manuscript. Responsibility for errors is ours.

Furthermore, Basima Abed is indebted to Abdulrahman Ayad for his support and help. In the same vein, Johannes Hackl extends his gratitude to Enrique Jiménez. A word of thanks is also due to Kristin Kleber and Kai Metzler for accepting this book for publication in the dubsar series. Unpublished texts in the British Museum are cited by kind permission of the Trustees of the British Museum.

## 0. The structure of this book

The present volume begins with an introduction, providing necessary background information on the extant Late Achaemenid texts from Šāter. This includes an overview of what is known about the city in general, a discussion of the protagonists of the archive reconstructed from these texts, and a section on abbreviations and conventions. As detailed in the introduction, these remarks are not intended to be exhaustive but serve as a preliminary summary of the Late Achaemenid record from Šāter.

The book is organized into two main parts. Part I (chapters 2 and 3, along with the appendix to chapter 3) presents a catalog and editions of 67 legal documents from Šamaš-zēru-ibni's archive in Šāter. Part II (chapter 4) provides a prosopography, including the person files compiled from the Šāter texts featured in this volume, as well as those published elsewhere (excluding those found in Abraham & Zilberg 2024). Reproductions of the texts in the form of photo collages as well as 57 autographed copies, prepared by Basima Abed for the original manuscript and digitally enhanced by Taichuan Tang for publication (see preface), are included in chapter 3 to enhance the usability of this book.

# 1. Introduction

## 1.1. General remarks

The 67 texts presented in this volume are part of a larger group of (Babylonian) Late Achaemenid legal documents from Šāter, a city that is believed to be located somewhere in the area northwest of Uruk up to the outskirts of Nippur.<sup>1</sup> The remaining components of this group which are available in published form fall into three sub-groups shaped by the vicissitudes of the antiquities trade in the early 20<sup>th</sup> and 21<sup>st</sup> centuries:<sup>2</sup> 7 texts housed in the Louvre and published in Joannès 1982 (“Louvre group,” Art I 35–Art II 2 = 430–403 BCE); 3 texts housed in the Vorderasiatisches Museum in Berlin and published in Hackl 2017 (“VAM group,” Art I [9]–25 = 455–439 BCE); and 28 texts held in a private collection in Jerusalem and published in Abraham & Zilberg 2022 and 2024 (“Jerusalem group,” Art I 12–36 = 453–429 BCE). To these can be added a fourth group, consisting of some 140 texts that, like the texts presented here (“IM group A,” Xer [x]–Art I 21 = c. 486–444 BCE), were confiscated by the Iraqi Antiquities authority and handed over to the Iraq Museum in Baghdad (“IM group B”).<sup>3</sup> Since the IM group B and the Jerusalem group came to our attention only when this manuscript was nearing completion, they will be dealt with in a separate volume, together with an in-depth study of the entire corpus. The following remarks are therefore not meant to be exhaustive but intended as a preliminary summary.

The 67 texts of the IM group A as well as many, if not all of the other sub-groups belong to the family archive of Šamaš-zēru-ibni, son of Ayya-naʿad, and his descendants who, judging by some of their names, were of West Semitic extraction (fig. 1).<sup>4</sup> By the conventional standards of attribution, that is, connections of prosopography, form, function and contents, at least 105<sup>5</sup> illicitly excavated pieces, possibly sourced from a single findspot (but see below), are the available sample from an original deposit of an unknown number of component texts. The fact that the texts have been so widely dispersed over so long a period, and the unknown archaeological situation of the excavated portion of the archive leave open the possibility that two or more archives, reflecting the activities of different

---

<sup>1</sup> See § 1.3.

<sup>2</sup> *Or.* 92 14, no. 5, another Late Achaemenid document drafted at Šāter, has at present no evident prosopographical ties to these sub-groups.

<sup>3</sup> The Jerusalem group can be attached to the IM groups on grounds of names and contents, all three of them forming parts of the same archive (see below). We therefore take it as practically certain that the Jerusalem texts, which are said to be unprovenanced (see, e.g., Abraham & Zilberg 2022: 75), were smuggled out of Iraq in recent years—that is, they represent the part of the archive that eluded the Iraqi Antiquities authority.

<sup>4</sup> See § 1.2.

<sup>5</sup> This number accounts only for the published texts, including those of the VAM group (see § 1.5.), but not *Or.* 92 14, no. 5 (see n. 2). Note that the texts of the VAM group might form the remnant of a separate archive.

IM group A.<sup>11</sup> But apart from business activities, the pertinent texts are silent on their affairs.

## 1.2. Onomastics

A perusal of the prosopography<sup>12</sup> shows that many individuals bore non-Babylonian, that is, mostly West Semitic names, albeit common Babylonian names outweigh these by far; and that there are no family or ancestor names present.<sup>13</sup> Given the supposed origin of the archive,<sup>14</sup> this comes as no surprise. Like the Murašû archive, it reflects the socioeconomic milieu in the hinterland of the larger Babylonian cities, defined by the concerns of a small population of active, mobile businessmen, who had no or next to no direct ties to the old and prestigious clans of the Babylonian urban elite. Even if these men bore Babylonian names, it is an obvious guess that many of them were also of West Semitic extraction, masked by the effects of acculturation. The family of the archive-holding Šamaš-zēru-ibni is a case in point.

Among the non-Babylonian names, the most noteworthy is the name of Šamaš-zēru-ibni's father Ayya-naʾad, as it underscores the presumed ethnicity of the family. It is of West Semitic, possibly Old South Arabian origin, consisting of the theophoric element Ayya and the predicative element *naʾad(a)*, which is formed on the root √N-ʾ-D “to praise.”<sup>15</sup> In addition to Ayya, several other West Semitic theophoric elements occur in the archive. The following table illustrates the distribution of these and other theophoric elements within the archive.<sup>16</sup>

| Theophoric element      | Occurrences (Name) | Occurrences (Patronym) |
|-------------------------|--------------------|------------------------|
| <b>Adad</b>             | 1                  | 2                      |
| <b>Addu<sup>‡</sup></b> | 1                  | 0                      |
| <b>Anu</b>              | 17                 | 3                      |
| <b>Ayya<sup>‡</sup></b> | 0                  | 1 (3)                  |
| <b>Baba (Bau)</b>       | 0                  | 2                      |

<sup>11</sup> On the possible occurrence of Šamaš-udammīq, see n. 8.

<sup>12</sup> For the corpus, see the introduction to chapter 4.

<sup>13</sup> An exception is the scribe Anu-balāssu-iqbī, son of Anu-ikšur of the Kurī family, who, judging by his (family) name, hails from Uruk. See § 1.5.

<sup>14</sup> For reasons of simplification, we address the sub-groups outlined in the previous section as an archive, in the loose Assyriological sense of the word, even though the latter might be the product of a conflation of two or more archives (see § 1.1.).

<sup>15</sup> See Zadok 2020: 197. For the spellings of the theophoric element, see Zadok 1977a: 44–46. The interpretation of the predicative element offered in Abraham & Zilberg 2022: 77 is not convincing because the spelling makes derivation from Akkadian *naʾādu* I (AHw. 693 s.v. *naʾādu*[m] I) and II (AHw. 705 s.v. *nādu*[m]) unlikely. See also the comment to IM 235482 No. 47: 2.

<sup>16</sup> Including the isolated document Or. 92 14, no. 5. (see n. 2).

| Theophoric element      | Occurrences (Name) | Occurrences (Patronym) |

Tab. 1: Theophoric elements in the archive<sup>17</sup>

<sup>17</sup> West Semitic theophoric elements have the sign “<sup>‡</sup>” added. Numbers in brackets reflect theophoric elements that occur in names of individuals whose patronyms are destroyed and *vice versa*. In such cases, the possibility remains that these are recurring individuals, that is, the theophoric elements in their names or patronyms are possibly counted twice or more. Damaged names starting with Bēl- are not considered, since it cannot be determined in these instances whether the element means “(Divine) Lord, God Bēl” or simply “lord,
