*The frequencies of Rifing - III Edition*

# Spooky<sup>2</sup>

Thanks

*The frequencies covered in this Rife manual are useful for almost all Rife Machines.*

*However, I think it is particularly suitable for all **Spooky2** users. I believe that this device is*

*the most complete and consistent Rife system on the current market.*

*Thanks to the study and the research performed by the Spooky2 Team and in particular*

*by John White, a great scientist who is revolutionizing the world of Rifing, it was possible to*

*prepare this manual. To them I give my gratitude (<http://www.spooky2.com>).*

*I also owe a warm thank to:*

*Echo Lee for the friendship and support she gave me for so many years and for the*

*realization of this work,*

*The Friends of all the Spooky2 Groups in the world, who with their suggestions and*

*indications, helped me make this book better,*

*The frequencies of Rifing - III Edition*

The frequencies of Rifing - *III Edition*

Introduction

Rifing is a technology that takes its name from Dr. Royal Raymond Rife, a great scientist, researcher and

inventor who, in the early decades of the last century, managed to discover an infallible method to devitalize

pathogens (viruses, bacteria and fungi). Rife was one of the first in the world to use electromagnetic frequencies

for therapeutic use and certainly the first to use this technology for the treatment of infectious diseases caused by

pathogens.

More than 80 years after his first successes, the technology invented by Dr. Rife has evolved in an

extraordinary way. Today, we can find many modern electronic devices being sold that are programmed with

software and provide for an excellent user experience. The modern Rife equipment cannot only apply the

frequencies for disabling individual microorganisms (killing frequencies), but also an immense number of

frequencies able to provide health benefits and/or well-being (healing), detoxification (detox) and the application

of active ingredients (molecular weight and relative frequencies).

Therefore, Rifing means the exposure to electromagnetic fields, characterized by precise frequencies and

harmonics, by means of various transmission devices, which are connected to a Rife Machine: i.e., to a frequency

generator. This technology offers the most extensive and complete application of electromagnetic waves for

therapeutic purposes.

In Germany and South Africa, as well as some other countries, frequency devices (such as *Rife Machines*) are

legally authorized as medical instruments. In all other countries, according to the legislation in force, such

frequency systems can be legally used only for testing, energy balancing, life extension, relaxation and

experiments on bacterial cultures or laboratory animals.

The main purpose of this manual is to facilitate the identification of a *Subject* and the corresponding

program of frequencies, according to criteria of logic and of origin, then be used with a frequency device.

Essentially, it aims to remove confusion from the process of choosing the right frequencies to use.

More than 7000 frequency programs are listed. They cover the human body organs, pathogens, diseases,

homeopathic products, minerals, vitamins, chakras and more. They are sorted and catalogued in a way that

makes it much easier to locate the information that will allow the best program choices.

Thanks to the *Notes* and the fact that all of the programs related to a topic are listed together and when necessary, repeated in additional paragraphs, it is possible to deal with a *complex* situation, following different

logical paths and then experimenting with various programs of frequencies, until reaching satisfactory or

conclusive results. Basically, this means that there are many situations you can try. If this does not work, follow

an alternative approach, using factors that may be considered marginal at the beginning or those that are radical

and profound. For this reason, the condition to be treated should always be studied well, with close attention

paid to the written Notes.

The frequencies of Rifing - *III Edition*

Even when it comes to a *simple* or a limited choice of cases, comparing two programs of nearly identical frequencies or locating an Author that is considered more reliable, the reader will be able to perform choices that with the passage of time will be more and more targeted and effective.

The most important novelty introduced in this edition is the one concerning the introduction in the Notes

section of the most known pathogens that could cause any kind of health problem. It is in fact now established

that fungi, bacteria and viruses are almost always involved in all diseases. Sometimes they are the cause of the

same, others may arise or proliferate where a disease is located. Therefore, whatever the cause, the devitalization

of the possible pathogens involved, can represent the temporary or permanent solution of the health problem.

When you understand and can test the effectiveness of this methodology, with a Rife Machine, it is then possible

to achieve increasingly satisfactory results. There are thousands of pathogens that can cause very serious damage

to an organism. In the Notes section, you will find listed only the best known or those involved in the most

common or serious health problems, so the list is not complete and for many diseases it may be missing a precise

reference. For this reason, especially when a frequency program does not achieve results, it is always advisable

to perform all possible research and techniques (e.g., Biofeedback), in order to identify which pathogens may be

present in any condition of discomfort. You may be amazed to discover that even a problem that we cannot even

imagine can be caused by pathogens (e.g., mental problems or back pain), which may actually be caused by

them.

Additionally, the order of the programs have changed compared to the previous edition and we tried to

follow a disposition that is much closer to that normally assumed in the Anatomy texts.

In conclusion, read carefully and patiently, this manual can very quickly enhance the expert use of a Rife

Machine such as Spooky2.

8

The frequencies of Rifing - *III Edition*

Dr. Royal Raymond Rife

Royal Raymond Rife was born on May 16, 1888, in the state of Nebraska, by Royal Raymond Rife senior of Ohio and Ida May Cheney of Creston, Iowa.

From a young age, he devoted all his interests in the field of bacteriology. He worked hard in this field and photographed many species of microorganisms for the University of Heidelberg.

Thanks to the important contributions that Rife provided to the University, he was awarded an honorary doctorate in parasitology in 1914.

Since his studies on bacteria necessitated frequent use of microscopes, Dr. Rife developed a propensity for optics and began studies in this area. From 1915 to 1920, Rife worked in his private laboratory, identifying and classifying the microorganisms that cause many diseases. By the end of 1920, he had begun to work on cancer, but the limits of the microscopes available at this time hindered him in the discovery of the viral cause of disease. In fact, standard search microscopes built with optical lenses, like those manufactured today, could only enlarge a microorganism up to 2,500 times. Rife felt that with this limitation, he could never discover the true cause of many illnesses. In 1920-21 Rife built his first microscope; the famous "Universal Microscope," which was a thousand times more powerful than other traditional microscopes. His microscope used monochromatic light frequencies and quartz prisms instead of electron beams, which kill microbes. Rife was the first man to observe microorganisms without killing them. By 1938, Rife had built another four models of microscopes, each more precise and powerful than the one before, finally reaching up to 60,000 X magnifications. For the first time in history, photographs and film footage was taken of viruses and bacteria. (See the "The San Diego Union" news

article).

It is in those years that Rife began to work

using

instruments

capable

of

delivering

electromagnetic frequencies. Rife wondered: "What

would happen if I subjected these micro-organisms

to different electrical frequencies?" With this revolutionary idea, he began to gather all the necessary tools such

as standard research microscopes, electronic generators capable of producing the high frequencies with which he

would work, bacteriological test tubes and instruments, guinea pig cages and other animals, machines for

photographing species and additional equipment to build their own models.

Between 1921 and 1922, he built the first machine capable of delivering electromagnetic frequencies, the

Rife Ray 1. Rife was assisted by Lee DeForest, the father of modern electronic tubes, which gave an important

contribution to the first radio technology.

The frequencies of Rife - *III Edition*

In 1933, he began working with Philip Hoyland, who lived in nearby Atladena, California. Hoyland helped Rife to build equipment, equipped with a ray tube that is a kind of plasma antenna consisting of a lamp filled with helium, powered by a very high voltage and driven by precise radiofrequencies. Both in the experiments performed in the laboratory and directly on the persons in care, Rife used this device to emit the frequencies capable of devitalizing the microbes by resonating them with electromagnetic waves.

Hoyland built most of the first machines, and in 1938 partnered with Royal Rife, to form Beam Rays Inc.

This company produced the Rife Ray 5 or Beam Ray, until it became bankrupt a few years later after a series of vicissitudes and judicial problems.

Through arduous experimentation and looking through the microscopes of his invention while applying different frequencies, Dr. Rife discovered that it was possible in this way to devitalize these

microorganisms. In fact, to determine which frequency would have killed a particular microorganism, it was absolutely essential to be able to observe them while they were alive, so that they could see the effect in real time.

His work was based on a basic principle called "coordinative resonance." To explain this principle, one could take as an example that of two tuning forks set to an absolute value: the moment one is stimulated, the other resounds. He thought, therefore, that with the stimulation of an electronic frequency able to pass through the tissues of the body, it was possible to devitalize a bacterium, without damaging in any way the organs or the cells invested, which instead have much higher resonance frequencies.

Rife described how he managed to find all the frequencies capable of killing the various microorganisms. As

a crystal glass breaks if invested by its resonance frequency, in the same way the pathogens can be devitalized

once their specific frequency has been identified.

So these electromagnetic waves, showed to possess the property of devitalizing or "killing" the

microorganisms if invested by the exact resonance frequency (different for each organism). To discover the exact

frequency of a pathogen, Rife with infinite patience observed the reactions under the microscope, varying from

time to time the frequency of his equipment, until he found the desired effects.

Rife called the precise frequency able to kill a microorganism, **MOR** (Mortal Oscillatory Rate).

In 1922, Rife began to study a way to identify and destroy the viruses that caused cancer. His research on

cancer took him ten years later, in 1932, to isolate the responsible pathogen that he called simply the BX virus.

In opposition to established medical theories, Rife in 1953 affirmed, that: "This BX virus can easily turn into

different forms during its life cycle according to the environment in which it grew up." Thus, its characteristic is

pleomorphism (passage to different forms), causing different diseases depending on the stage of its development

in the organism.

Another notable discovery was the PH-factor (acid-basic equilibrium). Rife declared that with a neutral PH,

he could not produce any culture. On the contrary, with a basic or acid PH, it was able to produce a culture of

microorganisms. Therefore, on the basis of this information, Dr. Rife came to the conclusion that as long as the

human body is able to maintain the PH of the different organic systems in the right and natural equilibrium, it

becomes impossible for a disease to develop.

After conducting thousands of experiments on infected cultures and animals, Rife was joined by some of the

most prestigious doctors in the country, who financed him and used his equipment on men, with positive

results.

In 1931 two people provided the maximum professional support to Dr. Rife: Dr. Arthur I. Kendall, director

of medical research at the Northwestern University Medical School of Illinois and Dr. Milbank Johnson, member

of the board of directors at Pasadena Hospital in California, very influential in Los Angeles medical circles. Dr.

Kendall had invented a protein culture medium, which he called "K-Medium," which allowed a bacterium to

remain isolated and to continue reproducing. This became a very important support for Rife's experiments. Rife,

Kendall and other scientists demonstrated that it was possible to grow bacteria artificially.

The technical discovery that leads to cancer treatment was published in the journal Science in 1931.

After the successes obtained by Rife and Kendall Dr.

Milbank Johnson on November 20, 1931 organized a dinner in

his Pasadena estate in honor of the two men, so that the

discoveries could be announced and discussed. Forty-four of

the most prominent doctors, pathologists and bacteriologists

in Los Angeles took part in this historic event advertised as

" *the end of all diseases*. " Among those present were Dr. Alvin G.

Ford, who 20 years later claimed to know little about Rife and

his findings and Dr. George Dock who worked at the

University of California Special Research Committee of the

South, first supervisor of clinical work, later among

opponents of Rife.

In 1934, Dr. Johnson began the first successful trials at the Jolla Clinic in California, on a series of patients

with cancer and tuberculosis. In this hospital the first clinical cancer work was started, established under a

special committee of the Medical Research of the University of Southern California, under the supervision of

Johnson himself. The trial involved 16 terminal cancer patients. After 3 months, 14 of these desperate cases were

declared as clinically healed by the staff of five doctors (Dr. Alvin G. Ford was the pathologist of the group), after

another 130 days, following a change introduced in the treatment, even the last two patients healed. The

treatments consisted in the application of electromagnetic waves for duration of 180 seconds, using a Rife Ray 3

set on the deadly frequency for cancer "BX," at intervals of 3 days. It was found that this time spent between two

treatments, led to better results than the cases treated daily. In this way, the lymphatic system was given the

opportunity to absorb and eliminate the toxic residues produced by dead microbes. The application of

electromagnetic waves did not cause the body temperature to rise, nor were special diets given during the entire

clinical treatment.

The results of this study showed that the cancer was caused by microorganisms and that such pathogens

could be painlessly destroyed and finally that this disease could be cured.

In the years following the clinical success of 1934, the technology and curative treatment of cancer patients

with Rife Ray, were discussed in medical conferences and data released in a medical journal.

The frequencies of Rifting - III Edition

11

In 1935, Dr. Johnson continued trials with a new machine installed at the Santa Fe Hospital in Los Angeles.

In 1936, Johnson realized that Rife needed a new workshop to continue his work and, thanks to the help of some

friends, he found the funds for the construction of a new and comfortable structure. In October-November of the

same year, Dr. Johnson began using a Ray Machine in the Pasadena Home for the Aged clinic, reporting that he

achieved excellent results.

Unfortunately, Dr. Johnson, a sufferer of heart, died in October 1944, while he was preparing a press release

on the successes obtained with these machines.

In an article dated May 6, 1938 in the Evening

Tribune, Rife, through a reporter, reported that he had

experienced

electrical

stimulation

on

various

microorganisms and he had noticed the individual

differences in the chemical constituents of the diseased

organisms and had observed the specifications of the

electrical characteristics and the polarities in the

organisms.

In 1939, his device was declared illegal and most of the 44 doctors who had acclaimed him eight years

earlier, denied ever having met him. Some incidents such as the destruction of his laboratory, the killing of some

people close to him and the destruction of all the documentation in their possession convinced Rife to put an end

to his research.

Rife with his machines, successfully treated hundreds of patients who were diagnosed with incurable

cancer and he received 14 awards and an honorary doctorate from the University of Heidelberg. All this

occurred without the use of poisonous medicines, invasive surgery, high medical costs and without the

dependence on doctors.

12

The frequencies of Rifing - *III Edition*

Spooky2

The Spooky2 journey started in March 2011 when an experienced Rife user and experimenter Johann

Stegmann experienced something that changed the course of his life.

After buying a new Rife machine, Johann's friend made the astounding claim that the DNA contained in

fingernails or hair could transmit energy frequencies directly to the owner of that DNA, simply by placing the

samples between the machine's electrodes - without applying the usual contacts to the skin of the person. Johann

was skeptical, but together with his friend decided to test this theory on his daughter, Tania, who is particularly

sensitive to energy. To his astonishment, he discovered that it worked perfectly.

How do you explain this phenomenon? Albert Einstein called it "spooky action at a distance." Modern

physics calls it "quantum entanglement." Simply put, it means that if any part of a single system is removed from

that system to a different location, any action performed on any part of the system, will also be instantaneously

performed on the parent system, and vice versa. In this case, the parent system is the body from which the DNA

sample is taken. With the exception of mature red blood cells, all human cells contain DNA, which is absolutely

unique to a single person. So when the energy of the frequencies is transmitted to a small sample containing

DNA (like a piece of fingernail), the effects will be instantly transmitted to the entire living organism from which

the sample was taken.

Over the following 18 months, Johann continued to experiment and discovered a way to monitor and verify

the effects of the frequencies remotely. In every case, his experiments worked perfectly.

In the course of his work, Johann discovered that many people couldn't afford to buy their own Rife

machines since the costs were prohibitive. So he started to seek out alternative devices. He joined forces with

technical designer Hank Gigandet. Together they tested many different instruments. They discovered that the

energy transmitted by many of the devices were harsh, unpleasant and ineffective. However, they also found

some that emitted soft, pleasant energy that not only made the test subjects feel good, but worked just as well as

the best commercial Rife machines.

The device they decided on was the UDB1108S DDS frequency generator. These were pretty inexpensive,

but the software to run them was written in Chinese and not really suitable for the specialized job of rifting. So

Johann and Hank commissioned their own software called RideUSB that would do what they wanted. It had one

limitation, however - it could only run one generator per computer.

Engineer and software developer **John White** had been following these developments with increasing

interest and excitement. After discussions with Johann and Hank, John decided he would write a new software

package that would not only embrace the functionality of RideUSB, but would also allow up to 126 frequency

generators to be run by a single PC.

That software was the original Spooky. Designed primarily as a remote Rife system, it could also be used as

a simple contact or plasma device when coupled with an amplifier. Very quickly, this system attracted an

international Team of electronic engineers, technicians, designers, software developers and Rife professionals,

whose intention was not profit or self-enrichment, but the worldwide spread of an affordable system based on

the Royal Rife technology.

The frequencies of Rifing - *III Edition*

13

Today's technology allows the generation of frequencies up to 40MHz in a very modestly-priced unit. But

the real power of a Rife Machine lies in the software, which creates the waveforms, durations, amplitudes, and

other essential parameters.

In May 2013, the Spooky team presented their first system, simply called Spooky. The software for this was

completely free, while the hardware cost less than a nice evening out.

After gaining useful experience with Spooky, the team developed a new system that includes a state of the

art frequency generator, the Spooky2-5M and then the new GX, with software designed to allow the best use of

all hardware capabilities.

To complete or expand the Spooky2 system, you can add:

***Plasma Tube***

This was the primary means used by Dr. Rife to devitalize pathogens. The tube acts as an antenna that

combines photon emission with electromagnetic waves and frequencies from the generator.

Keeping the tube close to the body and using the appropriate frequencies, you can devitalize pathogens

responsible for very serious diseases. This plasma device is *Spooky Central*. It is the quickest, most powerful and

effective way to destroy fungi, viruses and bacteria.

### ***Electrodes***

During the years when Royal Rife began working with John Crane, a method of applying frequencies was

introduced, which was much simpler and cheaper than the plasma tube: skin electrodes. Using this method of

transmission, electromagnetic energy is delivered through various types of electrodes: surgical steel cylinders (or

conductive rubber), metal plates or adhesive skin electrodes ( *Spooky TENS Pads*).

### ***Remote Transmission***

*Spooky Remote* is a device that arouses the greatest surprise in those who hear about it for the first time.

So does it work? Well, because DNA has two strands helically coiled around one another, it acts as an

antenna that's capable of transmitting and receiving information encoded on scalar energy signals via nonlocal

space. Spooky sends audio frequency energy to the nail. This energy is received by the DNA it contains, then

relayed instantaneously via *nonlocal space* to the parent DNA. Today's cell phones use antennas that are the exact

same shape as DNA.

The current Remote devices use the enormous power of scalar waves to make this form of remote

transmission even more effective. With Spooky Remote, scalar wave, "bubbles" are formed right where the DNA

is sitting. The waves are difficult to measure by orthodox means, as they act as a signal supercharger both for the

audio frequency energy and for the DNA's own transmission capabilities. The net effect is that the signal that

reaches the body is clearer and more powerful.

*Nonlocal space* has been referred to as "dark" energy (dark because it lies outside the electromagnetic spectrum and so can't be observed or measured). Nikola Tesla called it "the mind of God."

### ***Scalar Wave Technology***

The device just described, is not the only one to use Scalar Waves for treatments of any kind. The same

Team of researchers that has developed the Remote that has devised an apparatus capable of producing scalar

waves for treatments, which are able to give even more effective solutions, in case the problems are of a more complex nature.

John White's idea was to design a machine that could combine the discoveries of the two greatest characters

in recent history: Royal Raymond Rife and Nikola Tesla. Thus a machine was born that can emit frequencies of

care, with pure scalar fields. The system consists of two units, i.e., a transmitter and a receiver. Once the two

units have been tuned, the person being treated must be between the transmitter and the receiver. The Spooky2

Scalar is the first scalar treatment device to provide three different methods of transmission of scalar waves: pure

scalar, molecular scalar (in which it is possible to add the effect of a substance) and scalar Rife (making it

possible to add a "program" of frequencies). This way you can choose the best treatment to perform for your

needs.

### ***Complementary Accessories***

Completing the system are a Radionics apparatus ( *Spooky Radionics*), a coil for a magnetotherapy

applications ( *Spooky Coil*), a biofeedback system to detect pathogens in the body (integrated into the new GX

generator), a method for the production of Colloidal Silver and two Laser devices ( *Spooky Cold Laser Twin and*

Wrist) for Laser-therapy applications, described in a chapter of this manual.

Thanks to the continuous research and experimentation work of John White, we must always expect

something new.

Spooky2 is already the best Rife system in the world that is truly in a league of its own.

The frequencies of Rifing - *III Edition*

15

Guide to Using this Manual

**First column, Subject**

It indicates the name or subject of the frequencies program. Except for a few special applications such as

homeopathic remedies, minerals, vitamins, etc., it is almost always the name of a disease or pathogen.

The colors of the words have the function of highlighting of special interest subjects, while the colored boxes

group together items belonging to the same subject.

The items that have subjects in common are repeated several times in different paragraphs or chapters. For

example, the subject "Serotonin" (neuro transmitter which can also adjust the mood) is located both in the

chapter Cells, Amino Acids, Enzymes, etc., that in the one dedicated to the Mind, in the section that includes the

disorders related to depression.

## **Second column, Author**

Refers to the origin of the programs:

Rife are the original frequencies of the Dr. Royal Raymond Rife.

CAFL is the list of "Consolidated Annotated Frequency" based on years of experience of many Rife investigators.

PROV has produced consistent results in almost all the subjects with which it was used.

BIO and VEGA are research-based Russian frequencies, both very valid.

XTRA are programs of varied origin, chosen for their reputation and effectiveness.

ALT consists of programs based on the knowledge and practice of Ayurvedic, solfeggios and planetary

frequencies.

HC is the database of Dr. Hulda Clark.

KHZ includes programs with high frequencies.

In red are marked KHZ and HC in order to remember that when using these programs of frequencies, the

Rife device must be set with Offset 100% positive, Square Wave and Amplitude 9.5 volts.

**NEW** are new frequencies of various nature and origin, not present in the Spooky2 databases.

## **Third column, Notes**

This contains the description, details or explanations of what is written in the first column. Highlighted in

red sometimes are notes of particular utility, while the **blue** bold highlighting notes the pathogens that could be

involved in the health problem in question. It is reiterated that if no pathogen is reported in the Notes, it does not

mean that these microorganisms cannot be present, therefore it is always advisable to try to carry out research on

this, especially if the desired results are not achieved with the proposed program.

Some notes, relating exclusively to the Spooky2, indicate the settings that must be given to the software for

effective application of the frequencies program.

#### **Fourth column, Frequencies**

Is the listed the frequency program by Spooky2 software, which is to be used, if it is not a preset.

#### **Fifth Column, Organ**

Indicates the organ (generic or specific) concerned.

16

The frequencies of Rifing - *III Edition*

#### **Sixth column, Condition**

Indicates the possible causative condition of a state or a situation (i.e., Pathogens, toxins, cold, etc.) or, in

some cases, the specific organ affected.

#### **Seventh column, Seconds**

The application time is listed in seconds of each frequency of the program.

## How to Search

If the item you want to search is known, then simply locate the section from the index, find the subject in the

first column of the Manual and then write the word in the "Search" box of the software.

In the event that the search in both the book and on the software identifies more than one item, you must

pay attention to the content of the corresponding Notes, the Author and the execution time of each frequency.

You may also decide to:

- Set up a program with multiple programs of frequencies (not to exceed 4-5 sets or a total running time of

no more than 1.5 to 2 hours - for Remote Mode or Plasma Mode);

- If programs are different from another, regarding one or more frequencies and the rest are identical, you

might decide to choose the one that offers more possibilities;

- If two or more programs of frequencies have an identical subject, but Author and Frequencies are

different, you could first try the program written by an Author considered more reliable (e.g., CAFL than KHZ);

If you are unable to locate the issue in the book, proceed as follows:

- Enter the first letters in the "Search" box of the software;

- Read the results of research and, if you manage to locate the issue that is also in the Manual, compare the

results to choose the most appropriate program.

## **Database Update**

Scholars from all over the world continue to provide more and new frequencies and programs. The

Spooky2 Team has the most updates on these topics, so their database is constantly evolving. This should not be

a problem for the owners of this Manual: with following the search and comparison criteria above, you can

always get the best results.

In addition, over the years, several other databases of great interest have been added to the software. The

most important concern:

- A series of frequency programs related to pathogens, with the initials DNA and BP (Base Pair). In practice,

these are frequencies obtained from the genome of microorganisms, able to devitalize them;

- A group of over 9,000 programs in which the molecular weight (MW) of the same number of drugs,

supplements, molecules, etc., has been converted into a frequency.

These large databases, not listed in this manual, represent a further effective means for any health problem,

thanks above all to the commitment and intuition of the researcher Manuel Mallo.

Similarly to this manual there are some Frequency Programs that are not available in the Spooky 2 software

database. However, the Spooky2 software allows you to create and save independently, any Program of

frequencies you want to utilize by just using the Create Program command of the File Menu.

The frequencies of Rifing - *III Edition*

17

The screenshot displays the Spooky2 software interface. At the top, a search bar contains the text "nervous system". Below it, a list of programs is shown, including "Essential Oil - Cumin", "Essential Oil - Helichrysum", "Familial Motor Neuron Disease", "Friedreich's Ataxia", "Hypothalamus Balance", "Hypothalamus Function Balance", "Hypothalamus Stimulate Normal Function", "Leigh Disease", "Liver", "Minerals - Oxygen", "Minerals - Potassium", and "Nerve Disorders and Neuropathy". Each program entry includes its duration (e.g., 3 mins, 30 mins, 63 mins), a frequency code (e.g., MW, XTRA, KHZ, CAFL), and a list of frequencies (e.g., M568.886, M338.403, 190,570,1120,7500,27500,42500,96500,325430,415700,562970). On the right side, there is a "Database" panel with checkboxes for various databases: DNA, BP, MW, PROV, BIO/VEGA, CAFL, XTRA, and CUST. Below the list of programs, there is a "Loaded Programs" section and a "Program Description" section. The "Program Description" section for the "Liver" program shows "Other uses: pancreas, gallbladder, pain, migraine, ADD, alertness increase, nervous system, jet lag, circadian rhythm, hangover, relaxation/mood/sleep, nicotine withdrawal, self-healing, spiritual wisdom." The bottom right corner of the interface shows the page number "22 / 289".

In recent years the classic database of Spooky2 has been reduced to give space to the new databases

mentioned above. Previously it was possible that there were several programs with identical

frequency/frequencies (e.g., at 10 Hz that corresponded to the *liver*, pancreas, gallbladder, pain, migraine, etc.).

Currently all programs that have identical frequencies, have been deleted (except for what was considered the

most representative: e.g., *liver*). All other programs are however mentioned in the *Program Description* notes ( *Other uses: pancreas, gallbladder, pain, migraine, etc.* ).

Therefore, in cases like this, it is possible that when you perform the search for one program reported in this

manual on the software, you will not obtain any apparent result.

To overcome this problem, different methods can be used.

- The first is to write the entry in the " *Search*" box of the **Programs** folder. If you do not find it in the list that appears, most likely this word is, as already mentioned, in the *Program Description* notes. So just use the program

corresponding to that (or those) frequency and the problem is solved.

Here is an example: assume you want to search for "nervous system."

□

Write these two words in "Search" and you will not find any results.

□

In this book, in the frequency column, you will read "nervous system" corresponds to 10 Hz.

□

Scroll down the search list, in the software window, until you find 10 Hz and you will see that at this

frequency, it corresponds to "Liver."

□

By clicking on "Liver" you will find in the notes in the box *Program Description*: Other uses: pancreas, gallbladder, pain, migraine, ADD, alertness increase, nervous system, jet lag, circadian rhythm,

hangover, relaxation / mood / sleep, nicotine withdrawal, self-healing and spiritual wisdom.

□

At this point just click twice on "Liver" to be able to use the desired program.

Naturally the same method should be applied if the program includes more frequencies.

18

Loaded Programs

- Liver (XTRA)

Program Description

Liver

Other uses: pancreas, gallbladder, pain, migraine, ADD, alertness increase, nervous system, jet lag, circadian rhythm, hangover, relaxation/mood/sleep, nicotine withdrawal, self-healing, spiritual wisdom.

Create Program

Give your program a descriptive name. This will assist you when you do a program search.

Program Name

My Program

Frequencies (and optional advanced commands) are entered using a comma to separate each program step.

xxx-yyy Sweeps the frequency from xxx Hz to yyy Hz.  
=xxx x is the dwell (seconds) this frequency is to be applied. Example: 2127=180,2128=240,2127-2128=600

Wx x is the waveform for this frequency. W sets Out 1 and w sets Out 2. The values of x when specifying the waveforms are:

- 1 for Sine.
- 2 for Square.
- 3 for Sawtooth.
- 4 for Inverted Sawtooth.
- 5 for Triangle.
- 6 for Damped Sinusoidal.
- 7 for Damped Square.
- 8 for H-Bomb Sinusoidal.

Spooky2 - Create Program  
10 for User Defined #1

Frequencies  
10,20,100,10000,

Enter the default duration (in seconds) you wish to apply each frequency.  
Dwell  
180

Any notes for this program should be entered here. Spooky2 will include this in searches.  
Program Description  
Notes on the program and use

Email a copy to Cancer Clinic NZ

- Another method is to write the frequency (or the first two or three frequencies) shown in the "Frequencies"

column of the book, in the "Search" box. Also in this case you have to scroll through the list of results until you

find the same sequence of frequencies written on the book.

Taking the example as above, if in the "Search" box 10 is right, we must scroll through the list of results until

we find the frequency that interests us:

In all cases where you cannot find an entry in the Spooky database or in cases of frequencies that certainly

are not present (**NEW**), Spooky2 software allows you to create a frequency program without difficulty.

To do this, just click on the File Menu, then on Create Program, to access the following mask:

At this point in the Program Name, you will write the name you want to assign to the Program and in

Frequencies the list of frequencies, each followed by a comma (e.g., 10,20,30,). After this operation, click on the

green disk (top right) to save the Program created in your personal database (custom.csv).

**Frequencies**

**Organ**

*Condition*

**Sec.**

**Lymph System**

It plays the important role of draining tissues from liquids and waste substances and blocking the spread of pathogens. It is a system consisting of organs such as **bone marrow, tonsils, thymus** and **spleen**, and a series of **lymph nodes** (small glands located mainly in the neck, under the armpits and in the groin) connected together by a network of thin **lymphatic vessels**. The lymph contains the **white blood cells** (T and B lymphocytes).

## **Teeth**

*The most common bacteria concerning dental infections are:*

***Streptococcus mutans*** , the main organism causing dental caries

***Streptococcus sanguinis*** , represents 50% of dental plaque streptococci

***Streptococcus salivarius*** , represents 50% of streptococci contained in saliva

***Streptococcus milleri*** , implicated in the formation of dental abscesses

***Lactobacillus***, secondary colonizer in caries, mainly affects dentin

***Porphyromonas gingivalis*** is associated with rapidly progressive periodontitis

***Porphyromonas endodontalis*** appears to be specifically related to endodontic infections.

*Infections can also be caused by: **Actinobacillus actinomycetem-comitans**, **Porphyromonas gingivalis**, **Prevotella intermedia**, **Bacteroides forsythus**,*

***Campylobacter rectus**, **Eubacterium species**, **Fusobacterium nucleatum**, **Eikenella corrodens** and **Pepto-streptococcus micros**.*

**Organ**

***Condition***

**Sec.**

**Neoformation**

**Polyp** :is a pathological excrescence that is formed on a mucosa, a synovial or serous within the connective, projecting into a body cavity or into a channel.

**Cysts**: is a cavity or bag, normal or pathological, closed by a membrane distinct, containing a liquid material or semi-solid.

**Tumor or neoplasia**: is an abnormal cell proliferation and may be limited to the site of origin, or it can give rise to metastases.

**Adenoma** : is a benign epithelial tumor whose cells take on the appearance of a gland, or deriving glandular epithelium of an organ.

**Neuroma** : (more properly called traumatic neuroma) is a non-neoplastic proliferation, but hyperplastic, of Schwann cells and nerve fibers, which

follows to a trauma to a peripheral nerve which has led to its complete interruption and that is the outcome of a attempt ineffective regeneration of the nerve itself.

**Cancer:** only indicates a malignant tumor can produce metastases.

**Carcinoma:** malignant tumor of epithelial origin, or malignancy that is derived from any epithelial tissue, be it fabric lining (mucous membranes, skin) or glandular.

**Sarcoma:** cancer of the connective tissue, namely of the supporting tissue of the organism.

**Melanoma:** malignant tumor that originates in melanocytes, the skin cells that is responsible for the synthesis of melanin.

U ----- SPECTRUM VISIBLE -----

IR

IR

The light is the small part of the spectrum of the electromagnetic waves, that we can perceive with the eyes. The nature of light

is twofold: wave and particle; as wave is characterized by wavelength or frequency. The different wavelengths are interpreted by

the brain as colors ranging from red with the longest wavelength (lower frequency) to violet of shorter wavelength (higher

frequency). The photons, massless, are the elementary particles of light.

The therapies that use light and the colors are varied, these are the most known:

**Heliotherapy:** it is a very ancient natural circulation, which is based on exposure to sunlight for the treatment of various kinds of disorders including: dermatologic diseases, osteo-articular (activation of Vitamin D), respiratory, hematologic, the system circulatory and mood disorders.

**Light Therapy:** sunlight stimulates the serotonin and, especially in the Nordic countries where the insolation is very limited, this therapy is frequently used. In the field of chronobiology it is to administer light that plays the best conditions of the entire solar spectrum, through specific lamps, at a specific time, with a few sessions of ten minutes a day. The light through the optic nerve,

balance melatonin - serotonin and regulates circadian rhythms sleep - waking, improving mood, appetite and sleep quality. This

therapy thus exploits the close connection between the retina and the suprachiasmatic nucleus (nucleus of the hypothalamus, where

is located the biological clock of man) to reset the circadian rhythms that are out of phase in certain diseases, such as seasonal

depression and the bipolar. This therapy has therefore been found useful for the treatment of depression, bulimia, sleep disorders

and circadian rhythm, ADHD, dementia and altered sleep patterns, obsessive - compulsive disorder, headache not migraine and

cluster headaches, premenstrual syndrome, Chronic Fatigue syndrome, abnormal sleep patterns to work with night-day shifts, jet lag.

### **PhotodynamicTherapy**

**(PDT) :** or Photochemotherapy, is an innovative technique successfully used especially in the

treatment of cutaneous affections for the treatment of various pathological or aesthetic conditions, such as: removal acne,

photodamage or injury due to skin aging, actinic or solar keratosis, the pre-cancerous lesions and lesions cancer (basal cell

carcinoma, squamous cell carcinoma).

The therapy is based on the irradiation of light at certain frequencies and the application of a photosensitizing substance in

the form of cream or administered intravenously, which triggers an oxidative reaction only in causing pathological cells

favoring the elimination and replacement with new cells.

**Phototherapy:** is the use of light to cure a series of especially skin disorders (jaundice, psoriasis, etc.) And as a cosmetic treatment.

The patient is exposed to specific light waves for a period of time.

**Chromotherapy:** is an ancient therapeutic technique natural origin, which studies the meaning of the colors and exploit its

therapeutic properties to balance the chakras, relieve psychosomatic disorders and bring the body (which is a set of body, mind and

spirit) to a condition of well-being. Our body can absorb the colors in many ways (sun, lighting fixtures, clothes, food, etc.).

The chromotherapy light irradiation is the most effective technique: the electromagnetic waves transmit an energy capable of getting

deep into cells causing a series biological reactions, as better described hereinafter.

**Chromopuncture:** fruit of the brilliant idea of German researcher Peter Mandel (the early 70s), is a form of acupuncture that uses instead of needles, colored lights, which are directed on traditional acupuncture points to treat various diseases. The therapy is also applied on some points located on the ear (chromopuncture headset) demonstrating that in some cases is more effective than the

classical auricular puncture, given that the depth reached in the stimulation through the colors, is greater. These stimulations

normally arouse a feeling of pain, although bearable, in the ear points that correspond to the energy area of the body affected by the disease.

**Biophoton:** This is a sensational discovery of the German biophysicist **Fritz Albert Popp**, who was able to show that the cells of any living being, emit very weak light radiation; this light radiation is called biophotons. The emission of electromagnetic energy

propagates at the speed of light by means of DNA, which acts as a transceiver station allowing a constant electromagnetic

communication, both inter-cellular which with the outside world (also long-distance).

Popp also discovered that healthy bodies emit very coherent bio-photon. While in poor health, bodies emit less coherent photons. The

disease would be an interruption in the biophoton communication lines within the body due to parasites, viruses, fungi, pollutants etc.

Furthermore, while investigating a particular light radiation with a wavelength equal to 380 nanometers, he discovered that it is

associated with the repair of photo-phenomenon. If in fact a cell is damaged (and even almost totally destroyed) by the ultra violet

light, it can repair itself alone in a matter of a day if it is exposed to a radiation of the same frequency but of much lower intensity.

Two sets of frequencies, based on the studies of Dr. Fritz Albert Popp, can be found in the chapter of the "cancer" (Cancer Cell Repair 210

The frequencies of Rifing *III Edition*

## ***Condition***

## **Sec.**

Infrared rays are invisible to the human eye but we can perceive them as "heat": it is therefore radiant heat energy.

Therapeutic context, the thermal effect of infrared radiation causes vasodilation and benefits the circulatory system,

## **Infrared**

acceleration of metabolic exchange and other effects on the  
300 GHz – 428 THz / 1 mm – 700 nm  
peripheral nervous system and muscles.

It is useful to specify that the beneficial effects of irradiation to infrared rays, are much higher than those of simple heat treatments.

The Far Infrared Ray (FIR) are the only ones to transfer energy exclusively in the form of heat, perceived by skin thermoreceptors. Increase the potential difference of the cell

## **Infrared Type C (IRC)**

membranes and mitochondrial membranes by facilitating

300 GHz - 100 THz / 10000 - 3000 nm

exchanges between the cell and the external environment.

Favor the restoration of blood flow. *Depth of penetration into the skin up to 5-10 mm.*

### **Infrared Type B (IRB)**

*Depth of penetration into the skin up to 0.5 mm*

100 - 214 - THz / 3000 - 1400 nm

Are the most used in medical practice and physiotherapy and are indicated for the treatment of trauma, cervical or lumbar osteoarthritis, for disorders that affect the muscular system (stiff neck, back pain and other similar ailments). In

### **Infrared Type A (IRA)**

214 - 428 -THz / 1400 - 700 nm

addition they are used in case of injury (ie. to treat bed sores), since the radiated heat stimulates the natural regenerative processes of the body.

*Depth of penetration into the skin up to 0.1 mm.*

Is that small part of the spectrum of electromagnetic waves, which we can see. The length ( $\lambda$ ) of these electromagnetic waves is by extremely small and, knowing the frequency,

## Visible light

428 THz – 749 THz / 700 nm – 400 nm

can be calculated as follows:  $\lambda = c / f$

where  $c$  is the propagation speed of light equal to 300,000 km / s, and  $f$  is the wave frequency.

## Red

400 - 484 THz / 750 - 620 nm

It stimulates the growth of the cells and has an anti-inflammatory

It has the length of the lower wave and the more penetrating effect; for example wounds heal much faster and is useful for

power. Increases heart rate, breathing, blood pressure,

relieving contractures, strains and inflammation of the muscle

stimulates neuronal activity, endocrine and liver.

Associated element: Earth

fibers. It also helps to relieve the pain.

*This energy level is related to the first chakra Muladhara, or* **Indications:**

### **Indications:**

*It is the color of the seventh crown chakra, Sahasrara,*

anesthetic action, scarring, inflammation of the skin, bacterial and

*which belongs to the pineal gland, and for the Chinese is a viral diseases,*  
neuralgia, sedative of the nervous system.

*Yin color.*

The ultraviolet radiation is a type of light that can not be

perceived by the human eye and constitutes about 8% of

the solar radiation. Prolonged exposure to these rays can

### **Ultraviolet**

lead to the destruction of the collagen bridges increasing

749 THz – 30 PHz / 400 nm – 10 nm

the aging of the skin and at high doses can cause skin

cancer (basal cell carcinomas, squamous cell carcinoma

and melanoma).

The UV-A radiation promotes the degradation and excretion

of uric acid; its use is therefore recommended in case of gout. Also it causes an increase in antibodies in the blood,

## **UVA**

400 – 315 nm

thereby increasing the ability of the immune system to respond to infection. They penetrate deeply into the skin, so it is the main responsible for skin aging (wrinkles).

212

The frequencies of Rifing *III Edition*

## **Subject / Argument**

## **Author**

## **Notes**

## **Frequencies**

## **Organ**

## **Condition**

## **Sec.**

Exposure is commonly used to treat a number of skin conditions such as vitiligo, acne and psoriasis (the rays penetrating the skin, slows its growth). In addition, the UVB light: -

mobilizes calcium phosphate and increases the metabolism

## **UVB**

of calcium in the bones (in the irradiation applications are

315 – 280 nm

therefore indicated for the treatment of fractures);

- stimulates the production of "D" vitamin and is therefore

essential for the prevention of very serious diseases;

- lowers the blood sugar level if it is too high;

- stimulates the tan.

They are UVB but in a very narrow band, so that the

therapies which use these frequencies, can obtain the

maximum effective dose of radiation, and the minimum

dose of harmful radiation. They are used for the treatment of

## **UVB-NB**

311-313 nm

numerous dermatological diseases including psoriasis,

vitaligo, atopic dermatitis, cutaneous lymphomas, mycosis

fungoides, mastocytosis, nodular prurigo, pityriasis

lichenoid etc.

The UV-C irradiation is extremely dangerous (especially to

## **UVC**

the eyes) and a carcinogen, but that natural of sunlight, is

280 – 100 nm

"completely" screen from the Ozone wing.

The Ultraviolet germicidal irradiation, is a particular frequency of the UV-C, able to modify the DNA or RNA of micro-organisms (molds, bacteria and viruses), preventing

## **UVGI**

them from reproducing or be harmful. The germicidal lamps

253,7 nm

are used to sterilize the workplace and tools used in biology and medicine laboratories, for the disinfection of food, water and air.

## **LED and LASER Therapies**

The technology of laser light applied to the medical field saw its birth in the late '70s. In the years following the technique has evolved more and more. The use of this technology has expanded, including also LED light sources.

The main difference between the two light sources consists mainly in the fact that while the laser emits a coherent light, ie with all the rays in phase, the LED diodes do not have this characteristic. Both, however, emit monochromatic or single colored light, that is, at a precise wavelength, from infrared to ultraviolet (in the visible range each frequency corresponds to a specific color and vice versa).

In terms of frequencies, the visible spectrum varies between 400 and 1200 teraHertz which corresponds to a wave length ranging from

400 to 800 nm (nanometers) or a comparable size to that of human cells.

In phototherapy and in many other therapeutic applications of monochromatic light, it appears that the differences between the laser

and the LED are not appreciable since coherent light is converted into incoherent light when passed through the body. In practice the therapeutic effect depends on the wavelength, the dose and the intensity and therefore little or not at all on the coherence. The

absorption depends on the type of tissue that is irradiated and on the wavelength of the light. Light blue, green and yellow are almost completely

absorbed by the skin surface. The red light is better transmitted than these and the infrared even better, being able to

achieve a penetration depth of up to 10 mm.

For therapeutic medical devices (mainly laser), the shades used are light blue, green, yellow, red and infrared, but especially the

red/infrared light, between 630 and 900 nm, which are employed in most medical treatments. In this range of frequencies, the photons

activate mainly the final vector of the mitochondrial respiratory chain (cytochrome-c-oxidase).

Mitochondria are organelles present in all animal cells whose main function is that of cell respiration and production of ATP, a coenzyme that can provide power to all cellular reactions and the processes of the body including, for example, the transmission of nerve impulses and muscle contraction. Mitochondria occupy about 10-15 percent of the volume of a living cell.

Therefore, the red monochromatic light with a wavelength from 630 to 660 nm acts by interfering with the mitochondrial respiratory

chain of cells and more specifically on the enzymatic structures "cytochrome oxidase". This process results in an increased production of endogenous energy in the form of ATP (increase of 150%) that the cell will use to improve its functions. From the therapeutic point of view, this will manifest itself as an improvement of the functional activity of that tissue "photo-stimulated" and then in a rapid restoration of its integrity. From this knowledge derive many unexpected therapeutic applications.

The flow of light penetrating the tissues causes the biochemical reactions that induce several effects among which are:

- Vasodilation resulting in the increase in local heat, increase in cellular metabolic demands, neuro vegetative stimulation and

modification of intra-capillary hydrostatic pressure (lowers blood pressure);

- Increased lymphatic drainage and activation of microcirculation;
- Anti-inflammatory, anti-edema and improvement of the nutritional state of tissues because of the increase in blood flow due to capillary and arteriolar vasodilation;
- Significant acceleration of regenerative processes, acceleration of the healing of wounds, increase in the potential of the nerve cells and a greater production of collagen and elastin;
- Increased production of endorphins and, consequently, treatment of acute and chronic pain;
- Care of trauma , injury to the ligaments, tendons, bones, nerves, skin, dental problems and infections (including herpes).

So the applications are used in neurology, dentistry, dermatology (including cosmetic applications), physical therapy and rehabilitation (including the sports field).

The light can be applied to any part of the body: blood vessels, skin, soft tissues, muscles, bones, brain and with LED devices, also to the eyes. The correct position of the laser probes or those realized with a matrix of laser diodes or LEDs, it is important to avoid energy losses. Normally, the best position is perpendicular to the skin at the point of application and at a distance varying from 1-2 mm to a maximum of 1-5 cm. As already said, the light energy absorption primarily depends on the color of the light (or the wavelength of the beam) and on the constitution of the tissues that are invested by the radius (skin, blood, muscles, bones, etc.). The duration of the application depends on the energy (Joules / cm<sup>2</sup>) radiated by the probe as a function of the depth of the tissue to be treated and the type of the beam emission (continuous, pulsating, modulated).

The light can be emitted continuously (e.g. to relieve pain), pulsating (e.g. to stimulate healing) or modulated frequency (e.g. for the application of Rife frequencies). Many authors consider the modulated laser light more effective in terms of therapeutic effects; some combine the continuous emission with frequency modulation by using the patient's reactions.

Finally, there is a wide range of studies (reflex therapy) that examines the effects of frequencies, with the stimulation of the points of acupuncture meridians, chakras, or trigger point (Dr.Nogier, Dr.Bahr, Dr.Reininger, etc. ). The laser acupuncture combines the

advantages of traditional Chinese acupuncture with modern laser technology. The correct frequency modulation of the laser beam on a

point of meridians or acupuncture, stimulates the oscillation of the frequency of the meridian. This therapy is less invasive, less painful and safer than traditional acupuncture.

Later we will analyze the results of these studies using the above laser equipment.

## **Nogier Frequencies**

**Dr. Paul Nogier** (Lyon, 1908 - 1996) may be recognised as the father of Auriculotherapy and frequency therapy. He studied

Medicine in Lyon including homeopathy and acupuncture, brain stimulation.

After many years of study and research, he developed experimentally, some frequencies that enter into resonance with some biological

receptors and specific exert effects on the body. His research revealed that the outer ear, is energetically connected to the entire body.

Although there are no direct nerve connections between the ear and the rest of the body, the nerves from the ear do connect to reflex centers in the brain, which send neurological reflex messages to the spinal cord, and then to nerves connecting to the corresponding part of the body.

Today the results of his work are recognized by the World Health Organization (WHO).

The low frequencies are used for treatment. The high frequencies are used for laser devices (at a higher harmonic - n°128), with an

identical action. With respect to the reference frequency, it can be used variations ranging from -30% to + 30%.

The frequencies are used as a carrier of information. If a perfect resonance is reached, there will be a high therapeutic effect.

The left figure shows the frequency zones as discovered by Nogier; the therapeutic effect is obtained by applying a device to modulated laser light on the corresponding ear area.

The use of Spooky2 with these frequencies is possible with the **Spooky Cold Laser**.

### **Nogier Frequency A**

XTRA Cellular Vitality - Regenerating

2.28 / 293.625

*Nogier*

300

*Stimulate cell work, without stimulating the cell division. Resonates with the Ectoderm (outermost tissue) that forms skin,*

The frequency corresponds to

*glands, nerves, eyes, ears, teeth, brain and spinal cord. Used for traumata, crushing, oedema, hematoma, anoxia,*

*hypoxia, infarct, burns, inflammation, orifices, skin/tissue, epithelial tumors, acute diseases, nerve repair and reduces*

the Color Orange

*scar tissue. May be helpful with degenerative disorders. Frequency A is a universal frequency (as is G) to try for any*

*condition. Try D if a chronic condition related to A is not improving.*

### **Nogier Frequency B**

XTRA Nutritional Metabolism - Regenerating

4.56 / 587.25

*Nogier*

300

*Stimulate functions linked to pluricellularity. Resonates with Endoderm (innermost tissue) that forms the lining of the the*

*auditory tube, the lungs, the bladder, the urethra and the intestinal tract. It also forms the thyroid, thymus, liver, gall*

The frequency corresponds to

*bladder and pancreas. Improves nutritional assimilation, allergy problems and balances the parasympathetic nervous*

*system. Used for venous, lymphatic insufficiency, arteritis, auto immune diseases, digestive system (celiac disease,*

the Color Red

*malabsorptions, obesity, metabolic syndrome) osteoarthritic, abdomen, sedation, metabolic problems, chronic diseases*

*circulatory problems, edema and lymph problems. Is used in conjunction with C and G for tendon, ligament, joint and*

*other injuries where reaching secondary levels of tissue is needed.*

### **Nogier Frequency C**

XTRA Movement - Muscle Relaxing

9.125 / 1174.5

*Nogier*

300

*Stimulate the motor and excretion functions. Resonates with Mesoderm (middle tissue) that forms connective tissue such*

*as ligaments, tendons, cartilage, muscle and bone. It also forms the heart, blood and lymph vessels, kidneys, ovaries,*

The frequency corresponds to

*testes, spleen and the cortex of the adrenal gland. Used for muscle, bones, joints, circulation, movement disorders,*

the Color Yellow

*skeletal, myofascial pain atonia, hypertonia (trismus, intestine, arterial spasms, vesical or vesicular atony, constipation,*

*motor diarrhea, blood low pressure). When it used with B and G can be especially good for tendon and ligament injuries.*

*It also helps to relax the major muscle groups. Try D if chronic condition related to C is not improving.*

## **Nogier Frequency D**

XTRA Coordination - Muscle Relaxing

18.25 / 2349

Nogier

300

*Stimulate functions linked to symmetry phenomena, to displacement and locomotion. Helps to balance the two sides of*

The frequency corresponds to

*the brain. May also help reduce and handle stress. Used for laterality problems commissural, posture, ocular*

*movements, locomotion (walking disorders), brain, stress balance, relaxation, inter-hemisphere blocks. It is also*

the Color Red Tango

*recommended for chronic conditions not responsive to setting A or C. This setting to be a good supplement to A when*

*healing processes appear static.*

### **Nogier Frequency E**

XTRA Nerves - Analgesic

36.5 / 4698

*Nogier*

300

*Stimulate functions linked with medullar functions. Resonates with the spinal cord and peripheral nervous system,*

The frequency corresponds to

*reducing the excitability of nervous tissue. Used for spinal and skin disorders, pain control, nerves, neuralgia, Herpes*

the Color Petrol Blue

*zoster, spine/brain, reflex arc, medullary disorders and aid in diminishing excess calcification associated with chips, spurs*

*and arthritic conditions.*

### **Nogier Frequency F**

XTRA Emotional Reactions - Regenerating

73.406 / 9344

*Nogier*

*Stimulate functions of the sub cortical cortex. Resonates with the subcortical or lower regions of the brain, including the*

*thalamus and hypothalamus (centers for body functions). May also help with muscle spasms, facial pain, headaches.*

*Has been used for non-healing bone fractures and to help balance hormones and with activating humoral and endocrine*

The frequency corresponds to

*functions. Used for healing, tissue regeneration, bone reconstruction, face, mouth, brain central commands, dys-*

### **BAHR frequencies**

The physician **Dr. Frank Bahr**, Germany, discovered various frequencies which are used since many years. He was a student of Nogier and is today the President of the largest German acupuncture society. He detected more than 14 major bio-frequencies (BAHR 1, BAHR 2) and Chakra frequencies.

The BAHR-Frequencies correspond to ear points and body acupuncture, three skin tissues layers and the nervous system.

## Reininger

(1) A method to find the exact frequency for the treatment of a disease, it is called "the Nogier Pulse" or **RAC** (Reflex Auriculo Cardial) or VAS (Vascular Autonomic Signal). According to this technique, the physician with one hand radiates the painful area or the corresponding ear area, while with the other hand the patient's pulse. If changing the frequency of the laser is observed a variation of the pulse, it means that that is the right frequency to use. This method is similar to muscle testing used in kinesiology.

# PERIODIC TABLE OF THE ELEMENTS

## PERIODIC TABLE OF THE ELEMENTS

Alkali Metals

Alkaline Earth

Transition Metals

Basic Metals

Metalloid

Non Metals

Halogen

Noble Gases

Lanthanides

# Actinides

**Subject / Argument**

**Author**

*Notes*

**Frequencies**

**Organ**

*Condition*

**Sec.**

**Chemical Elements and Minerals**

*Retains calcium & magnesium in bones, converts*

**Minerals - Boron**

XTRA

320=600,

*Minerals*

600

*Vitamin D, aiding calcium absorption.*

*Bone, nerve impulse, blood coagulation, muscle*

**Minerals - Calcium**

XTRA

320=600,

*Minerals*

600

*contraction.*

### **Minerals - Cesium**

*XTRA Provides pH balance .*

440=600,

*Minerals*

600

*Insulin, glucose & lipid, regulation of nerve impulse*

### **Minerals - Chromium**

*XTRA transmission , serotonin, controls blood sugar levels,*

384=600,

*Minerals*

600

*diabetes helper.*

*Hemoglobin, enzyme reactions, cholestrol regulation,*

### **Minerals - Copper**

*XTRA*

464=600,

*Minerals*

600

*thyroid & liver functions.*

### **Minerals - Gold**

*XTRA Brain function, vitality, longevity, restful sleep.*

316=600,

*Minerals*

600

### **Minerals - Iodine 1**

*XTRA Primary thyroid hormone.*

424=600,

*Minerals*

600

### **Minerals - Iodine 2**

*XTRA Helps clear 6th and 5th chakra blocks.*

53,20.007,425.89,459.12,

*Minerals*

180

*Oxygen to cells , circulation, digestion, elimination,*

### **Minerals - Iron**

*XTRA respiration, tissue oxidation, liver, hemoglobin,*

416=600,

*Minerals*

600

*immunological response.*

*Electrical impulse, bone & ligament formation, uptake*

### **Minerals - Magnesium**

*XTRA of potassium & calcium, immunological response,*

384=600,

*Minerals*

600

*prevention of dental cavities.*

*Brain , bone, thyroxin (thyroid), collagen, intestinal*

### **Minerals - Manganese**

XTRA

400=600,

*Minerals*

600

*tract, laryngeal, liver, ovaries, generative organs.*

### **Minerals - Molybdenum**

*XTRA Molybdenum.*

336=600,

*Minerals*

600

*Phosphate source to manage energy , synthesize*

### **Minerals - Phosphorus**

*XTRA protein, fat, carbohydrates, contracts muscle (heart), 480=600,*

*Minerals*

600

*hormone production & Vitamin B utilization.*

### **Minerals - Platinum**

*XTRA Bacteria, viruses, fungi.*

312=600,

*Minerals*

600

### **Minerals - Potassium**

*XTRA Alkalizer, electrolyte, kidney, cellular, energy .*

304=600,

*Minerals*

600

### **Minerals - Rhodium**

XTRA *Thymus regeneration.*

45,3.172,67.52,72.79,

*Minerals*

180

### **Minerals - Selenium**

XTRA *Antioxidant, heart health.*

272=600,

*Minerals*

600

*Formation of collagen in bone, cartilage & connective*

### **Minerals - Silica**

XTRA

448=600,

*Minerals*

600

*tissue.*

### **Minerals - Silver**

XTRA *Antibiotic .*

376=600,

*Minerals*

600

218

The frequencies of Rifing *III Edition*

**Subject / Argument**

**Author**

*Notes*

**Frequencies**

**Organ**

*Condition*

**Sec.**

**Minerals - Sodium**

XTRA *Sodium*.

352=600,

*Minerals*

600

**Minerals - Sulfur**

XTRA *Liver, bile, skin, wounds. Also spelled sulphur.*

256=600,

*Minerals*

600

*Healthy glucose, lipid metabolism, prevention of tooth*

### **Minerals - Vanadium**

XTRA

368=600,

*Minerals*

600

*decay, diabetes helper.*

*Antiseptic, antibiotic, antioxidant, metabolism of  
nucleic acid, protein synthesis, mucosal linings,*

### **Minerals - Zinc 1**

XTRA

480=600,

*Minerals*

600

*hormone production, prostate gland, regulates  
hunger, Vitamin A utilization .*

### **Minerals - Zinc 2**

*XTRA Helps harmonize body, mind, spirit.*

30,6.254,133.13,143.52,

*Minerals*

180

*Toxic metal. Present in chemtrail sprays. See Detox*

### **Aluminum 1**

XTRA

15950,

*Minerals*

180

*sets.*

### **Aluminum 2**

XTRA

554.67,597.95,

*Minerals*

180

### **Antimony 121sb**

XTRA *Heavy metal, binding metal.*

509.39,549.13,11684.56,

*Minerals*

180

### **Antimony 123sb**

XTRA *Heavy metal, binding metal.*

275.86,297.37,12655.27,

*Minerals*

180

**Arsenic as**

XTRA *Heavy metal.*

364.56,393,16724.61,

*Minerals*

180

*Heavy metal. Present in chemtrail sprays. See Detox*

**Barium 135ba 1**

XTRA

211.46,227.96,19402.34,

*Minerals*

180

*sets.*

**Barium 137ba 2**

XTRA

236.56,255.02,21705.08,

*Minerals*

180

## **Beryllium be**

XTRA *Toxic heavy metal.*

299.14,322.49,13723.62,

*Minerals*

180

## **Beryllium**

XTRA *Heavy metal. Detox.*

16350,

*Minerals*

180

## **Bismuth bi**

XTRA

342.06,368.75,15692.37,

*Minerals*

180

## **Boron 10b**

XTRA *Heavy metal.*

228.75,246.59,20988.27,

*Minerals*

180

**Boron 11b**

XTRA *Heavy metal.*

682.97,736.25,15666.02,

*Minerals*

180

**Bromine 79br**

XTRA *Can cause thyroid problems by replacing iodine.*

533.29,574.9,12232.9,

*Minerals*

180

**Bromine 81br**

XTRA *Can cause thyroid problems by replacing iodine.*

574.87,619.73,13186.52,

*Minerals*

180

**Cadmium 111cd**

XTRA

451.38,486.61,20708,

*Minerals*

180

## **Cadmium 113cd**

XTRA

472.18,509.02,21662.11,

*Minerals*

180

## **Cadmium**

XTRA *Heavy metal.*

14325,

*Minerals*

180

## **Calcium 2**

XTRA

143.21,154.38,13140.62,

*Minerals*

180

## **Carbon c**

XTRA

535.24,577,12277.34,

*Minerals*

180

**Cesium cs**

XTRA *Heavy metal.*

279.22,301,12809.56,

*Minerals*

180

**Chlorine 35cl**

XTRA *Element, halogen group.*

208.56,224.84,19136.72,

*Minerals*

180

**Chlorine 37cl**

XTRA

173.62,187.15,15929.69,

*Minerals*

180

**The Spine Frequencies**

In *June Leslie Wieder's* book "Songs of the Spine", each vertebra has a frequency to which it responds. By

transmitting these frequencies in sequence, the aim is to get the spine back into good working conditions

- in essence, to realign the vertebrae correctly.

There are two versions of these frequencies, one of which is calibrated to the A=440Hz scale (Wieder's original),

and the other to the A=432Hz scale (experimental but based on sound science). Try both and use whichever one

produces the best results.

The frequencies may also be used individually or on a parallel Channel together with other frequencies if desired.

These two Programs are in the Spooky database, named Spine Problems A=432, and Spine Problems A=440.

### ***Notes***
