Сначала вяжется первый ярус по меньшей схеме, потом под ним провязываются арочки из 2 в.п.,  
после чего уже в эти арочки провязывается второй ярус лепестков по большей схеме.  
Все лепестки нужно обвязать соединительным столбиком.

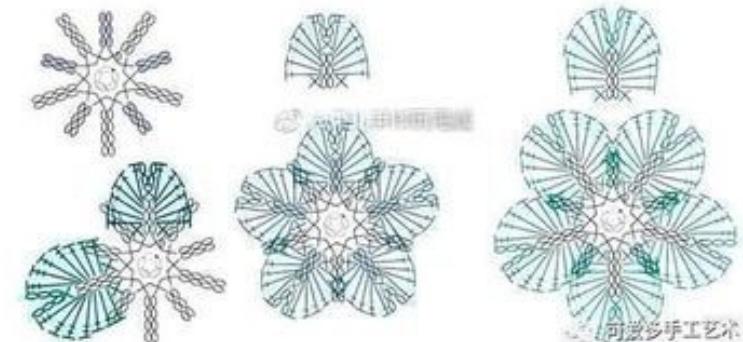

Сначала все безобразно закручивается, но после обвязки и при желании отпаривания,  
цветок словно распускается.
