

What do you think of people who waste water?

I believe wasting water is **irresponsible** and **harmful** to the environment. Water is a **precious resource**, and many regions around the world suffer from **water shortages**. People who waste water often do so out of **habit or ignorance**, leaving taps running unnecessarily or using excessive amounts for daily activities. I think it's important to raise **awareness** about **water conservation** so that future generations won't face **serious shortages**.

- **Irresponsible** – mas'uliyatsiz

- **Harmful** – zararli
- **Precious resource** – qimmatli resurs
- **Water shortages** – suv tanqisligi
- **Habit or ignorance** – odat yoki beparvolik
- **Water conservation** – suvni tejash
- **Serious shortages** – jiddiy tanqisliklar

What are the characteristics of goods transported by water?

Goods transported by water are usually **large, heavy, and non-perishable**. This includes **raw materials** such as coal, oil, natural gas, and agricultural products like wheat and rice. Since shipping by water is **cost-effective** over long distances, many companies use it for **bulk transportation**. However, these

goods often require **strong packaging** to prevent **damage from moisture and rough handling** during transit.

- **Large, heavy, and non-perishable** – katta, og'ir va buzilmaydigan
- **Raw materials** – xom ashyo
- **Cost-effective** – iqtisodiy jihatdan samarali
- **Bulk transportation** – ulgurji tashish
- **Strong packaging** – mustahkam qadoqlash
- **Damage from moisture** – namlikdan zarar ko'rish

What are the pluses and minuses of transporting goods on water?

One of the biggest **advantages** of water transportation is its **cost-efficiency**, especially for large shipments. Ships can carry **huge amounts of cargo** over long distances at a **lower cost** compared to air or road transport. Additionally, it is **environmentally friendly**, as ships produce less **carbon emissions** than planes and trucks. However, a **major disadvantage** is that water transport is **slow**, which makes it unsuitable for **urgent deliveries**. Moreover, it depends on **weather conditions**, and rough seas can lead to **delays or accidents**.

- **Advantages** – afzalliklar
- **Cost-efficiency** – tejamkorlik

- **Huge amounts of cargo** – katta hajmdagi yuk
- **Lower cost** – arzonroq narx
- **Environmentally friendly** – ekologik jihatdan qulay
- **Carbon emissions** – karbon chiqindilari
- **Major disadvantage** – katta kamchilik
- **Slow** – sekin
- **Urgent deliveries** – tezkor yetkazib berish
- **Weather conditions** – ob-havo sharoitlari
- **Delays or accidents** – kechikish yoki baxtsiz hodisalar

Are rivers and lakes good for transport?

Yes, rivers and lakes can be **very useful for transport**, especially in countries with **extensive water networks**. They provide a **natural and cost-effective** way to move goods and people. Many **historical trade routes** were based on rivers, and even today, places like the **Amazon River** and the **Mississippi River** are key **transportation routes**. However, **limited accessibility** and **seasonal changes** can make them **unreliable** in some cases.

- **Extensive water networks** – keng suv yo'llari tarmog'i
- **Natural and cost-effective** – tabiiy va tejamkor
- **Historical trade routes** – tarixiy savdo yo'llari
- **Transportation routes** – transport

yo'llari

- **Limited accessibility** – cheklangan kirish imkoniyati
- **Seasonal changes** – fasliy o'zgarishlar
- **Unreliable** – ishonchsiz

Why do people like to live near water?

People like to live near water because it offers **beautiful scenery**, a **cooler climate**, and easy access to **water resources**. Many cities are built near rivers, lakes, or the sea because these locations provide **economic opportunities**, such as **fishing**, **trade**, and **tourism**. Additionally, living near water is often associated with a **relaxed lifestyle**,

which is why many people prefer beachfront or lakeside homes.

- **Beautiful scenery** – go‘zal manzara
- **Cooler climate** – salqinroq iqlim
- **Water resources** – suv resurslari
- **Economic opportunities** – iqtisodiy imkoniyatlar
- **Fishing, trade, and tourism** – baliqchilik, savdo va turizm
- **Relaxed lifestyle** – tinch hayot tarzi
- **Beachfront or lakeside homes** – dengizbo‘yi yoki ko‘l bo‘yidagi uylar

What water sports are popular in your country?

In my country, popular water sports include **swimming, kayaking, jet skiing,**

and fishing. During the summer, many people visit lakes and rivers to enjoy **boating and rafting.** Recently, **stand-up paddleboarding** has also gained popularity. Although we don't have a strong surfing culture, some coastal areas offer **wind surfing** and **scuba diving** for tourists.

- **Swimming** – suzish
- **Kayaking** – kayakda suzish
- **Jet skiing** – suv skuteri haydash
- **Fishing** – baliq ovlash
- **Boating and rafting** – qayiqlash va rafting
- **Stand-up paddleboarding** – taxta ustida eshkak eshish
- **Wind surfing** – shamol sörfingi
- **Scuba diving** – suv ostida sho'ng'ish

Why do people like water sports?

People enjoy water sports because they are **fun, refreshing, and physically engaging**. They offer a great way to **stay active** while also **cooling off** in hot weather. Many water sports, like **swimming and kayaking**, provide an **excellent workout** that strengthens the muscles and improves **stamina**. Additionally, sports like **diving and snorkeling** allow people to **explore marine life**, which is an exciting and unique experience.

- **Fun, refreshing, and physically engaging** – qiziqarli, tetiklantiruvchi va jismoniy faollikni oshiruvchi

- **Stay active** – faol bo‘lish
- **Cooling off** – sovush, salqinlash
- **Excellent workout** – zo‘r mashq
- **Stamina** – bardoshlilik
- **Diving and snorkeling** – sho‘ng‘ish va snorkelling
- **Explore marine life** – dengiz hayotini o‘rganish
