## LaceLocks: The Ultimate No-Tie Shoe Solution

Say goodbye to tying your shoes with LaceLocks! Designed for ultimate convenience and ease, LaceLocks allow you to effortlessly put on and take off your shoes without ever needing to tie or untie laces.

### How it works:

- Simply weave LaceLocks with the shoelaces already in your shoes - as shown in the picture.

- Tie a knot at both ends of the lace and either tuck the excess lace inside the shoe or trim it short.
- To secure your foot, slip your shoes on, bring the two halves of LaceLocks together at a slight angle, until the two halves mate together. **Notice that one half has angled cuts made on in to it to help mate LaceLocks together!**
- Twist the LaceLocks until you hear a satisfying snap, ensuring the two parts sit flush together—your shoes are now locked in place!

## Why Choose LaceLocks?

- Quick, easy, and secure fastening.
- Say goodbye to loose or untied laces.
- No more fussing with knots—just a simple twist and snap.
- Comfortable and reliable all day long.

## How to print:

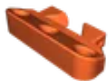

I recommend 4 perimeters at 0.4mm nozzle and 25% infill to ensure longevity.

I made mine out of PETG, but really any filament will do.

**Unlock convenience and comfort with LaceLocks—your new favorite way to wear shoes!**
