

APRIL - JUNE 2025

18:00 - 20:00 Beijing time
VIRTUAL

Co-organized by the Multilateral Cooperation Center for Development Finance (MCDF), Ministry of Finance of Saudi Arabia, Islamic Development Bank (IsDB), and Asian Development Bank (ADB), this workshop series aims to share practical experiences on innovations in renewable energy technologies and services among developing countries, technology companies, emerging economy financiers, and international financial institutions. The series will include a discussion of connectivity and standards related to frontier renewable energy technologies.

Target Audience: The Workshop Series is designed for officials of Ministries of Energy, Planning, and Finance in developing countries, and power and grid utilities across Asia and Africa. Other participants will include developing country financiers, institutional investors, project developers and renewable energy technology companies.

The three workshops in the series are:

Workshop 1: Innovations in Energy Connectivity Infrastructure	10 April 2025
Workshop 2: Innovations in Solar Energy	14 May 2025
Workshop 3: Innovations in Renewable Energy Storage	2 June 2025, TBC
