

# Why learn English?

---

*Jin Lee has spent nearly a decade studying English. His story might surprise you, but it also holds a powerful lesson. Let's dive into his experience and discover: What does learning English truly mean to him?*

---

"I'm a fourth-year student at a prestigious university in Korea, just months away from graduation. Soon, I'll start working at a taxi company in a small town near Seoul. For almost 10 years, I've studied English. And if I'm being honest, I used to think it was all a waste of time.

At first glance, English doesn't seem to fit into my life. My job won't require it — everyone at the company speaks Korean, and our town sees few foreign visitors. In my free time, I can read Korean newspapers, watch Korean TV, and stay informed about the world without ever needing English.

I've often wondered: What if I had spent those hours differently? I could have deepened my knowledge of history, explored the rich literature of my country, or even pursued other passions. Instead, I spent years studying English—just to pass exams. It felt pointless.

But here's the twist: **What if I've been looking at it all wrong?**

English isn't just a language; it's a bridge. A bridge to new ideas, cultures, and opportunities. It's a tool that can unlock doors I never knew existed. Maybe I don't need English for my job today, but what about tomorrow? What if I want to travel, connect with people from around the world, or explore global perspectives?

The truth is, learning English isn't just about passing exams or meeting immediate needs. It's about growth. It's about preparing for a future that's full of possibilities. It's about becoming a citizen of the world.

So, while I once saw my years of studying English as a waste, I now see them as an investment—an investment in myself. And who knows? Maybe one day, that investment will pay off in ways I can't even imagine yet.

Don't let doubt hold you back. Every skill you learn, every hour you invest, shapes your future. Keep going. Keep growing. Your journey is just beginning."

**What's your reason for learning English?**

Let Jin's story inspire you to see the bigger picture. The effort you put in today could lead to extraordinary opportunities tomorrow. Keep learning, keep dreaming, and keep building bridges to your future!
