

“Collapse of the European Ecosystem”

A Short Essay By The NSAP (National Socialist American Party):

A destroyed ecosystem is typically called an "ecosystem collapse" - meaning it has undergone such significant disruption that it has lost its key defining features and functions, often leading to a dramatic change in the species composition and inability to sustain the organisms that once thrived there; essentially, the ecosystem has failed to function as it once did. Think carefully, what does this scenario remind you of? Anthropomorphize this, think locally. Obviously this is a mimicry of your major cities. This is, most importantly, a mirror of all Western and European cities today. As National Socialists, we understand what has brought this on. We understand the root cause of this. We know not only what the root cause is, but WHO is responsible for it. Our predecessors have done most of the work for us; They have explained race, and showed us what has happened throughout the ages when a multitude of cultures, traditions, and nations (peoples) mix, or cohabitate. It only takes 2-3 generations for the society to completely dissolve, always with violent and bloody fervor. We are at that precipice today. It is melancholy yet exhilarating, for those with understanding. This social dissolution, this Jew World Order, or this Jewish vision for our future, can quite literally be called the “Collapse of the European Ecosystem”.

Think of what our cities, our nations, even our people have become. We have degraded into nothing more than trapped beasts, like those poor nearly extinct species we see at the zoo. The American people are frightened, we live in a world of uncertainty, in a system built by an alien group who hate us. This is the end goal that the Jewish tribe has for us all, as outlined by Jewish EU founder Richard von Coudenhove-Kalergi exactly 100 years ago in his book (not so much a book, but an outline for Jewish world domination), *Practical Idealism*. The synopsis? Infect all European blood with non-European blood to create an incurable disease called miscegenation. Then the IQ will be considerably and permanently lowered, creating a race of Euro-Asiatic-Negroid mocha colored mud peoples, as he called them, who will be too stupid to revolt, and easily ruled over by an “elite” Jewish aristocracy. In other words, the Jewish financial elite seek to destroy the European bloodline because

they see us as their greatest enemy. After all, our people have been against the Jew throughout history, for their devilish ways are incompatible with what we consider morally & ethically correct. This is why Jews have been expelled from countless European settlements dating all the way back to the time of the Roman Empire.

The only way to combat the reality of our collapsing ecosystem, and to prevent the Jewish domination of our world is to dismantle international Jewish power, starting right here in the heart of it all, America. This means that we must first identify, then separate, then remove every Jew from our land. From then on, all we have to do is reverse the work of the Jew to rebuild our European ecosystem. That reversal stems from an 18th century German philosophy, practicalized into a political and social ideology called National Socialism. The National Socialist combats the Jewish spirit and puts his own race first! In order to help heal the whole world, a race must first help and heal his own. The National Socialist is the great conservator of his people, and of nature and of all the creatures within every ecosystem. Even after the economic “ecosystem” collapse in 1931, Germany flourished financially within only a few short years after the rise of National Socialism in 1933 and became an economic European powerhouse. This is still possible today, and America can still be reclaimed by its rightful citizens. Only through the work of the Aryan people, Hitler’s spirit will rise from the grave, and the world will know that he was right.

National Socialism will save the world!
