Read the following sentences and answer the question. "The restaurant's name, Fifteen, comes from the number of students the restaurant had when it started in 2002. Today, Oliver has three of these restaurants; and a few hundred students have finished the program. Around 90 percent of the graduates are still working in the food industry. Some own restaurants or work in some of the best kitchens around the world. Others are now starring in their own TV shows. They're all great examples of what young 30 people can do if they're given the opportunity and support." What do some of the graduates do after finishing the program

- a ☐ .They work in offices
- b ☒ .They own restaurants
- c ☐ .They become doctors
- d ☐ .They travel around the world

Read the following sentences and answer the question. However, Watson isn't human. He, or rather it, is a machine, a wonder of technology made by researchers at IBM. In the game, Watson used math to decide on an answer. When a question was read out, Watson was immediately given the same question in electronic form. It analyzed the question and searched its memory bank-about the same as one million books of information-for possible answers. It then narrowed the options down to one answer. If Watson felt around 75 percent confident about the answer, it would answer the question. What did Watson use in order to answer during the game
